

AVISHKAR AI — COMPLETE COPY REPLACEMENT

Hand this to your developer. Every section maps 1:1 to the current site.

FIND → REPLACE format throughout.

PAGE 1: HOMEPAGE (/)

NAV BAR

REMOVE: Products / Solutions / Industries / Resources / Company / Pricing

REPLACE WITH:

- Products ▼ (FSM Platform | Vision Inspection | Field Intelligence Suite)
- Solutions ▼ (ATM Networks | Telecom Towers | Medical Devices | HVAC)
- Company ▼ (About Us | Contact)

REMOVE CTA: "Get started"

KEEP CTA: "Book Demo" → primary button, blue gradient

HERO SECTION

EYEBROW TAG

REMOVE: "AI-native field service"

REPLACE: "Built for critical infrastructure"

HEADLINE

REMOVE: "The AI-native field service platform that runs itself"

REPLACE:

"Critical infrastructure fails in seconds.

The response used to take 45 minutes."

SUBHEADLINE

REMOVE: "Avishkar AI transforms reactive field service into autonomous operations. AI handles scheduling, dispatch, customer communication, inventory, and predictive maintenance—so your team focuses on the work, not the logistics."

REPLACE:

"Avishkar is an AI-native dispatch layer for ATM networks, telecom towers, and medical devices. When a fault fires, our AI picks the ticket, finds the right engineer, orders parts, follows up, and closes the loop — in under 5 minutes. No human in the middle."

CTA

REMOVE: "Work email" input + "Book a demo" secondary

REPLACE: Single primary CTA → [Book a Demo]

Add below: "Live with ATM manufacturers and tower operators across India."

HERO IMAGE

REMOVE: Generic dispatch workspace image

REPLACE: Keep image slot but update alt text to:

"Avishkar AI — real-time fault dispatch for ATM and telecom infrastructure"

PROBLEM SECTION

HEADLINE

REMOVE: "Field service is broken. Here's why."

REPLACE: "Every minute of downtime costs thousands. The fix took 45 minutes."

SUBHEADLINE

REMOVE: "Avishkar AI is built for intelligence-first operations: autonomous scheduling, voice, customer comms, and inventory—so coordinators stop firefighting and start steering outcomes."

REPLACE: "ATM operators, tower companies, and medical device teams have accepted slow, manual dispatch as a fact of life. We proved it isn't."

PROBLEM TABS — REPLACE ALL 4:

TAB 1:

TITLE: "The fault fires. Nobody acts."

REMOVE: "The dispatch chaos / Manual scheduling creates conflicts..."

REPLACE: "A fault event hits your monitoring system. An alert fires in the NOC. Then a human picks it up — maybe. They call around to find an engineer. Check if parts are available. Dispatch. The clock has been running for 20 minutes already."

TAB 2:

TITLE: "The engineer arrives unprepared."

REMOVE: "The communication gap"

REPLACE: "Without the right context — fault type, asset history, required parts — engineers arrive and diagnose from scratch. First-fix rates drop. Return visits pile up. SLAs breach."

TAB 3:

TITLE: "No visibility. No accountability."

REMOVE: "The knowledge leak"

REPLACE: "Operations managers have no real-time view of what's happening in the field. Ticket status is a phone call away. Escalations get lost. Nobody knows if the SLA clock is running out."

TAB 4:

TITLE: "Legacy systems don't talk to each other."

REMOVE: "The inventory blind spot"

REPLACE: "Your monitoring system, your ERP, your parts inventory — siloed. Connecting them requires a human. Every time. That human is the bottleneck."

PROBLEM STAT

REMOVE: "Average Indian field businesses lose ₹35+ lakh/year to dispatch inefficiency."

REPLACE: "The ATM industry's average fault response time: 45 minutes. Avishkar's: 5 minutes."

FEATURES SECTION

HEADLINE

REMOVE: "Everything your field service business needs. Powered by AI."

REPLACE: "The AI that runs the entire dispatch loop. End to end."

TABS — REPLACE ALL:

TAB 1 — Fault Ingestion (was: Scheduling)

TITLE: "Fault in. Ticket open. Instantly."

BODY: "The moment your monitoring system fires a fault event — SCADA, NOC, telemetry, legacy software — Avishkar picks it up via API. No human triage. No queue. Instant classification by fault type, asset, severity, and location."

TAB 2 — Engineer Assignment (was: Voice agent)

TITLE: "Right engineer. Right skills. Seconds."

BODY: "Avishkar scans your field engineer network in real time — availability, location, certification, current workload — and assigns the best match. The engineer gets full fault context on mobile before they leave."

TAB 3 — Parts Orchestration (was: Field app)

TITLE: "Parts ordered before the engineer arrives."

BODY: "Avishkar checks inventory in real time, reserves required parts, and coordinates delivery to the site — automatically. Engineers arrive ready to fix, not to diagnose."

TAB 4 — Real-Time Follow-Up (was: Customer portal)

TITLE: "AI follows up. You don't have to."

BODY: "Avishkar tracks every open ticket in real time. If a repair is delayed, it follows up with the engineer automatically. If there's an escalation — the engineer talks directly back to the AI. No phone tag. No missed updates."

TAB 5 — Ticket Closure (was: Inventory)

TITLE: "Closed loop. Every time."

BODY: "When the fix is confirmed, Avishkar closes the ticket, logs the resolution, updates your

CRM and reporting, and generates compliance documentation automatically. Nothing falls through the cracks."

TAB 6 — Analytics (was: Predictive / Analytics)

TITLE: "Full visibility across your network."

BODY: "Every engineer, every ticket, every asset — live. SLA risk flagged before breach.

Resolution times, first-fix rates, and engineer performance tracked automatically. Operations managers finally have the dashboard they needed."

HOW IT WORKS SECTION

HEADLINE

REMOVE: "From chaos to clarity in four steps"

REPLACE: "From fault event to fixed — in 5 minutes."

STEPS — REPLACE ALL 4:

STEP 01:

REMOVE: "Connect your business / Import customers, jobs, technicians..."

REPLACE:

TITLE: "Fault detected"

BODY: "Your monitoring system fires. Avishkar receives the fault event instantly via API — no human sees it first. It reads the fault code, asset ID, location, and severity in real time."

STEP 02:

REMOVE: "AI learns your operations / Historical patterns..."

REPLACE:

TITLE: "Engineer assigned"

BODY: "Avishkar identifies the nearest qualified engineer with the right certification and tools. Assignment happens in seconds. The engineer gets full fault context on their mobile device immediately."

STEP 03:

REMOVE: "AI takes over the routine / Scheduling runs automatically..."

REPLACE:

TITLE: "Parts coordinated"

BODY: "If the repair requires parts, Avishkar checks inventory, reserves or orders components, and coordinates delivery — before the engineer arrives on site."

STEP 04:

REMOVE: "Continuous improvement / Every outcome is measured..."

REPLACE:

TITLE: "Ticket closed"

BODY: "Avishkar tracks progress, handles escalations, confirms the fix, closes the ticket, and generates compliance documentation. The full loop — automated."

INDUSTRY SOLUTIONS SECTION

HEADLINE

REMOVE: "Built for every type of field service"

REPLACE: "Built for infrastructure that cannot fail."

INDUSTRY CARDS — REPLACE ALL 6:

CARD 01:

REMOVE: "HVAC / Seasonal demand forecasting..."

REPLACE:

TITLE: "ATM Networks"

BADGE: "Live"

BODY: "Every minute an ATM is offline is lost revenue and a customer turned away. Avishkar cuts dispatch from 45 minutes to 5 — automatically, without a human dispatcher."

STAT 1: "5 min avg dispatch"

STAT 2: "vs 45 min industry standard"

CARD 02:

REMOVE: "Plumbing"

REPLACE:

TITLE: "Telecom Towers"

BADGE: "Live"

BODY: "Tower downtime means thousands of subscribers go dark. Avishkar dispatches the right certified engineer before your SLA clock runs out — every time."

STAT 1: "Real-time SLA tracking"

STAT 2: "Zero-human dispatch"

CARD 03:

REMOVE: "Electrical"

REPLACE:

TITLE: "Medical Devices"

BADGE: "Deploying"

BODY: "When biomedical equipment fails, response speed is patient safety. Avishkar dispatches certified biomedical engineers and generates compliance documentation automatically."

STAT 1: "100% audit trail"

STAT 2: "Auto compliance docs"

CARD 04:

REMOVE: "Home services"

REPLACE:

TITLE: "HVAC — Critical Facilities"

BADGE: "Coming Soon"

BODY: "Data centers, hospitals, cold chain — HVAC failure in these environments is a crisis, not an inconvenience. Avishkar treats it that way."

STAT 1: "Priority dispatch"

STAT 2: "Facility-grade SLAs"

STATS / ROI SECTION

HEADLINE

REMOVE: "The numbers that matter"

REPLACE: "The numbers we can actually stand behind."

NOTE TO DEVELOPER:

REMOVE all animated counters showing 0% placeholders.
These look fake and will destroy YC credibility.

REPLACE WITH 4 static, real stat cards:

STAT 1:

NUMBER: "5 min"

LABEL: "Average dispatch time"

SUBLABEL: "From fault event to engineer assigned"

STAT 2:

NUMBER: "45 min"

LABEL: "Industry average we replaced"

SUBLABEL: "Manual dispatch, ATM sector"

STAT 3:

NUMBER: "2"

LABEL: "Live enterprise customers"

SUBLABEL: "ATM manufacturer + telecom tower operator, India"

STAT 4:

NUMBER: "APAC"

LABEL: "Next expansion region"

SUBLABEL: "In advanced conversations with global operators"

REMOVE ENTIRELY: ROI Calculator section and link

REMOVE ENTIRELY: "500+ service businesses" social proof bar (it's fake)

TESTIMONIALS SECTION

REMOVE ENTIRELY:

The Sarah Chen / HVAC company testimonial. It's clearly a placeholder and YC will know.

REPLACE WITH a simple quote block:

QUOTE: "We are live with an ATM manufacturer and a telecom tower company in India. We're not showing you what we could do — we're showing you what we've done."

ATTRIBUTION: "Avishkar AI — founded in India, building for the world."

INTEGRATIONS SECTION

HEADLINE

REMOVE: "Works with what you have"

REPLACE: "Sits on top of your existing monitoring stack. No rip-and-replace."

INTEGRATION TILES — REPLACE ALL:

REMOVE: QuickBooks, Xero, Stripe, HubSpot, Facebook, etc.

REPLACE WITH:

CATEGORY 1: "Fault Monitoring"

Items: SCADA Systems | NOC Software | Legacy Telemetry | IoT Sensors

CATEGORY 2: "Asset Management"

Items: ATM Management Systems | Tower Management Platforms | BMS / CMMS

CATEGORY 3: "Parts & Inventory"

Items: ERP Systems | Warehouse Management | Parts Catalog APIs

CATEGORY 4: "Reporting & Compliance"

Items: CRM Platforms | Compliance Dashboards | SLA Tracking Tools

REMOVE: "MagicPlug integration—connect anything in minutes" tagline

FINAL CTA SECTION

HEADLINE

REMOVE: "Ready to run your business on AI?"

REPLACE: "See a live fault dispatched in under 5 minutes."

BODY

REMOVE: "Join 500+ service businesses already on Avishkar AI..."

REPLACE: "We'll show you exactly how Avishkar detects a fault, assigns an engineer, coordinates parts, and closes the ticket — on your infrastructure type. No slides. No generic demo. Your use case."

TRUST BADGES — REPLACE:

REMOVE: "No credit card required / Setup in 1 day / Cancel anytime"

REPLACE:

- ✓ Live in India today
- ✓ Integrates with your existing monitoring stack
- ✓ Deployed in weeks, not months
- ✓ Founders on every demo call

CTA BUTTONS

REMOVE: "Start free trial" and "ROI calculator" buttons

KEEP: Single "Book a Demo" primary button

FOOTER

TAGLINE

REMOVE: "AI-native field service management for operators worldwide"

REPLACE: "AI-native dispatch for critical infrastructure — ATMs, towers, medical devices."

FOOTER NAV — REPLACE:

Products column:

- AI-Native Dispatch (was: FSM Platform)
- Vision Inspection
- Field Intelligence Suite (REMOVE: AI Voice Agent, Predictive Maintenance)

Solutions column:

- ATM Networks (was: HVAC)
- Telecom Towers (was: Plumbing)
- Medical Devices (was: Electrical)
- HVAC — Critical Facilities (was: Home Services) (REMOVE: Commercial, Emergency Services)

Resources column:

REMOVE: ROI Calculator, Comparison Guide, Webinars

KEEP: Blog, Documentation, API Docs

Company column:

KEEP: About Us, Contact

REMOVE: Leadership, Careers, Partners, Press (too early — looks like filler)

SOCIAL PROOF BAR AT BOTTOM — REMOVE ENTIRELY

(The "0+ service businesses / 0.0M+ jobs" counter is the most damaging element on the site)

PAGE 2: FSM PLATFORM (/products/fsm-platform)

EYEBROW

REMOVE: "Products"

REPLACE: "AI-Native Dispatch Platform"

HEADLINE

REMOVE: "The AI-native field service platform core"

REPLACE: "The dispatch system your engineers wish they had."

SUBHEADLINE

REMOVE: "The flagship Avishkar AI FSM layer—scheduling, dispatch, customer and job management, inventory, and analytics—built for operators who want intelligence-first automation, not another passive system of record."

REPLACE: "Avishkar replaces manual dispatch with a fully autonomous AI loop — from fault detection to ticket closure. No human dispatcher required. No missed SLAs. No phone tag."

TABS — REPLACE ALL:

TAB 1 — was "Scheduling engine"

NEW TITLE: "Fault Ingestion"

CONTENT:

- Receives fault events from any monitoring system via API
- Reads fault code, asset ID, location, and severity instantly
- Classifies ticket by type, priority, and required resource
- No human triage. No queue. Zero delay.

TAB 2 — was "Dispatch board"

NEW TITLE: "Engineer Assignment"

CONTENT:

- Scans field engineer network in real time
- Matches by: location, skill certification, availability, current workload
- Assignment confirmed in seconds
- Engineer receives full fault context on mobile instantly

TAB 3 — was "Customer & job management"

NEW TITLE: "Parts Orchestration"

CONTENT:

- Checks parts inventory against fault requirements automatically
- Reserves or orders required components before engineer departs
- Coordinates delivery to site or engineer location
- Zero parts-related return visits

TAB 4 — was "Reporting & analytics"
NEW TITLE: "Real-Time Follow-Up & Escalation"
CONTENT:

- Tracks every open ticket against SLA clock
- Follows up with engineer automatically if delayed
- Engineers escalate directly back to AI via mobile
- Escalation routed to right person with full context, instantly

ADD TAB 5 — new:
TITLE: "Ticket Closure & Compliance"
CONTENT:

- Auto-closes ticket when fix confirmed by engineer
- Logs resolution code, parts used, time-to-fix
- Updates CRM and reporting dashboards automatically
- Generates compliance documentation for every service event

OLD WAY vs AVISHKAR TABLE (ADD THIS SECTION)

INSERT after the tabs section:

HEADLINE: "The old way. And ours."

The Old Way	Avishkar
Fault fires → human picks ticket	Fault fires → AI picks ticket instantly
Manual call to find engineer	AI assigns nearest qualified engineer in seconds
Parts checked manually	AI checks + pre-orders parts automatically
Follow-up via phone calls	AI follows up with engineer in real time
Engineer calls dispatcher to escalate	Engineer talks directly to AI
Ticket closed manually	Ticket auto-closes on fix confirmation
Average response: 45 minutes	Average response: 5 minutes

PAGE 3: COMPANY (/company)

EYEBROW

REMOVE: "About Avishkar AI"

REPLACE: "Our Story"

HEADLINE

REMOVE: "Building the AI-Native Future of Field Service"

REPLACE: "We built the dispatch system critical infrastructure deserved — but never had."

SUBHEADLINE

REMOVE: "Avishkar AI was founded on a simple belief: field service businesses deserve intelligent tools that work as hard as they do. We're the flagship brand of Anjaneya AI Technologies Pvt Ltd—building an intelligence-first field service platform for operators worldwide."

REPLACE: "The ATM industry accepted 45-minute response times. Telecom operators assumed manual dispatch was inevitable. We looked at both and asked: what if the entire dispatch loop was run by AI? Five minutes later, we had our answer."

CTAs

REMOVE: "Join Our Team"

KEEP: "Get in Touch"

ADD: "Book a Demo"

OUR STORY SECTION

REMOVE ALL 3 EXISTING CARDS. REPLACE WITH:

CARD 01 — Origin:

TITLE: "The problem nobody was questioning"

BODY: "Critical infrastructure — ATMs, towers, medical devices — goes down constantly. Every time, a human picks up the phone, finds an engineer, and dispatches manually. The industry accepted 45 minutes as the minimum response time. We didn't."

CARD 02 — Insight:

TITLE: "The gap we found"

BODY: "The technology to dispatch in 5 minutes already existed. The monitoring systems were already firing fault events. The engineers were already in the field. Nobody had built the AI layer connecting all of it — end to end, without a human in the middle."

CARD 03 — What we built:

TITLE: "What we built"

BODY: "Avishkar is an AI-native dispatch layer that sits on top of your existing monitoring stack. Fault in → engineer assigned → parts coordinated → ticket closed. Fully autonomous. Live with ATM manufacturers and tower operators in India. Expanding across APAC."

WHAT WE BUILD SECTION

HEADLINE

REMOVE: "AI-Native Solutions for Field Service"

REPLACE: "The platform. Three layers."

PRODUCT CARDS — REPLACE:

CARD 1:

REMOVE: "FSM Platform / Intelligent scheduling, dispatch, and operations management"

REPLACE:

TITLE: "AI-Native Dispatch"

BODY: "The core engine. Receives fault events, assigns engineers, coordinates parts, follows up, closes tickets. End to end. No human dispatcher."

CARD 2:

REMOVE: "AI Voice Agent"

REPLACE:

TITLE: "Vision Inspection"

BODY: "Computer vision layer that detects faults from cameras and IoT sensors — before a human reports them. Triggers the dispatch loop automatically."

CARD 3:

REMOVE: "Vision Inspection / AI-powered photo documentation"

REPLACE:

TITLE: "Field Intelligence Suite"

BODY: "Real-time visibility into every engineer, ticket, asset, and SLA across your network. Operations teams finally have the dashboard they needed."

REMOVE CARDS 4, 5, 6: (Predictive Maintenance, Field Intelligence Suite, MagicPlug)

VALUES SECTION

HEADLINE

REMOVE: "What Drives Avishkar AI"

REPLACE: "How we operate"

VALUES — REPLACE ALL 5:

VALUE 1:

REMOVE: "Customer Obsession / Everything we build starts with customer problems."

REPLACE:

TITLE: "We own the outcome"

BODY: "When a fault fires and an ATM goes down, our customers are losing money. We measure ourselves by dispatch time, resolution rate, and SLA compliance — not feature releases."

VALUE 2:

REMOVE: "Outcome Orientation"

REPLACE:

TITLE: "Specificity over claims"

BODY: "5 minutes. 45 minutes. Two live customers. APAC expansion. We say what we've actually done — not what we could theoretically do."

VALUE 3:

REMOVE: "Long-Term Thinking"

REPLACE:

TITLE: "Integration, not replacement"

BODY: "We don't ask customers to rip out their monitoring systems. We sit on top. That's how you get to deployment in weeks, not 18 months."

VALUE 4:

REMOVE: "Transparency"

REPLACE:

TITLE: "Build for the hardest use case"

BODY: "Medical devices. ATM networks. Telecom towers. If it works here, it works everywhere. We chose critical infrastructure deliberately."

VALUE 5:

REMOVE: "Humble Execution"

REPLACE:

TITLE: "Founders on every call"

BODY: "Every demo is run by a founder. Every customer gets our personal number. We don't hire account managers before we earn the right to."

LIFE AT AVISHKAR SECTION

REMOVE ENTIRELY: "Entrepreneurial Operating System® (EOS) / Total Rewards / Employee Engagement"

(Too early stage. Makes you look like a 500-person company pretending. YC will flag this.)

REPLACE WITH a single honest paragraph:

HEADLINE: "We're a small team building something big."

BODY: "We're early. We're lean. We're live with enterprise customers and expanding across APAC. If you want to build the infrastructure that keeps critical systems running worldwide —

talk to us."

CTA: [Get in Touch]

COMPANY DETAILS SECTION

KEEP:

- Legal Name: Anjaneya AI Technologies Pvt Ltd
- Flagship Brand: Avishkar AI
- Founded: 2024

REMOVE: "Team: Growing team across engineering, product, and go-to-market" (vague)

REPLACE: Keep this blank or remove entirely.

GLOBAL COPY RULES FOR DEVELOPER

1. KILL ALL ANIMATED ZEROS Every "0%" and "0.0M+" counter on the site must be removed. Replace with real, static numbers or remove the section entirely.
2. KILL THE SARAH CHEN TESTIMONIAL Placeholder testimonials destroy YC credibility. Remove until you have a real one.
3. KILL "500+ service businesses" This is fake. Replace with: "Live with ATM manufacturers and telecom tower operators in India."
4. KILL THE PRICING PAGE Too early. Redirect to Book Demo.
5. KILL ALL HVAC/PLUMBING/ELECTRICAL/HOME SERVICES REFERENCES These position you as a Fieldproxy clone. You are not.
6. THE ONE STAT THAT MUST APPEAR ON EVERY PAGE "45 minutes → 5 minutes" This is your story. It should appear in the hero, the problem section, the product page, and the company page.
7. THE ONE CLAIM THAT MUST APPEAR ON EVERY PAGE "Live with ATM manufacturers and telecom tower operators in India." This is your proof. Real. Specific. Credible.
8. META TITLE & DESCRIPTION — UPDATE SITEWIDE: TITLE: "Avishkar AI — AI-Native Dispatch for Critical Infrastructure" DESCRIPTION: "Avishkar cuts ATM and telecom fault response from 45 minutes to 5. AI-native dispatch for ATM networks, telecom towers, and medical devices. Live in India. Expanding across APAC."
